

Susan had a headache.
Activity 1: Listen and circle.

1.

2.

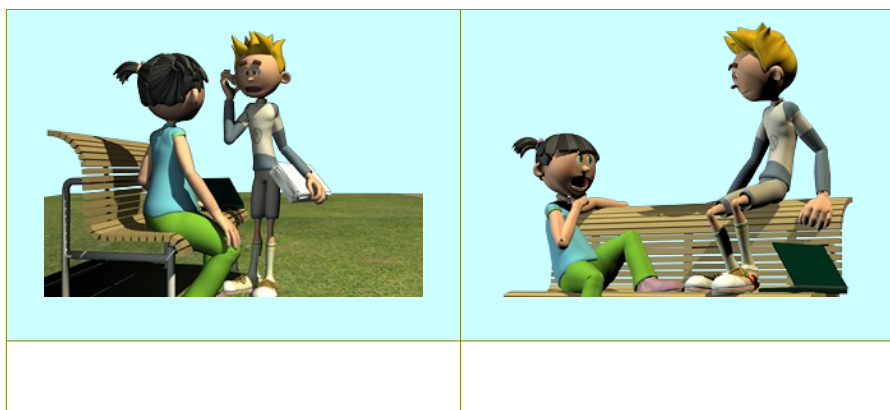

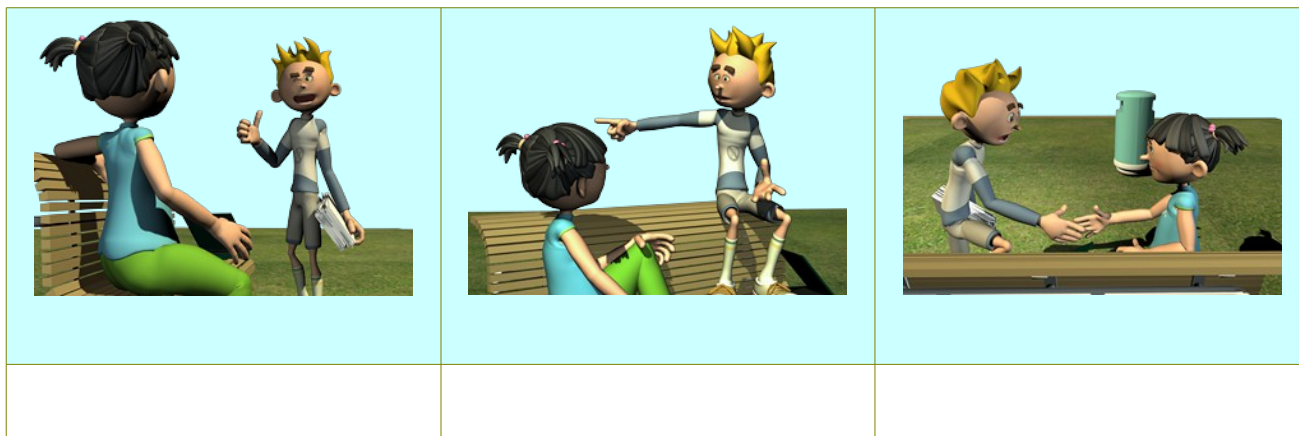

3.

4.

Susan had a headache.
Activity 2: Identify and number.

Susan had a headache.
Activity 3: Complete the text.

was ill flu sore throat cold school
 Monday headache earache

It was _____ morning. Susan and Rick met at _____. Susan _____ ok but she was _____ last weekend. At the weekend she didn't have an _____ but she had a _____. She also had a _____. She didn't have _____ but just a _____.

Susan had a headache.
Activity 4: Can you guess the illness?

It usually begins with a sore throat.
You have a runny nose and a cough.
Sometimes you have a mild fever.

It's a pain you feel in your ear, usually
due to an infection.

It's an illness caused by a virus. You feel
pain in your body muscles and you have
a high temperature. You feel sick and
weak.

You have it when your throat hurts.
It makes you cough.

To expel air from your lungs
suddenly and noisely.

You have it when your head hurts.

...and a bit more:

Part of your body that gets hot when you
have a high temperature

Person you visit when you are ill

Place you go when you don't feel well

It's too tiny and causes flu

Susan had a headache.
